Philadelphia Terra-Cotta Works

FOR 1872.

NOTICE.

TO OUR CUSTOMERS AND THE TRADE
IN GENERAL.

UR Agent, Mr. S. A. Harrison, of
No. 1010 Chestnut Street, hav-
ing retired from the business of sell-
ing our

Sewer Pipe, Chimney Tops, Chimney Flues, Garden
Bases, Statuary, Pedestals, &c.,

we would respectfully ask his former
customers to send us any orders they
may have for the above ware.

We now occupy as a city wareroom
and branch office, the store No. 612
Market Street, south side, above Sixth
St., where we shall be pleased to see
all who may contemplate using any of
the ware manufactured by us.

Respectfully,

LINK & BLACK.

Vitrified Water, Drain

—AND—

SEWER PIPE,

From 2 to 18 inch Bore,.

FOR DRAINING FACTORIES,

“ “ DYE-HOUSES,

“ “ DWELLINGS,

“ “ PUBLIC WORKS,

“ “ REFINERIES,

“ “ SLAUGHTER-HOUSES,

“ “ BREWERIES.

FOR CITY DRAINS & SEWERAGE.

The best, cheapest, and most imperishable article for the
above purposes ever manufactured.

CITY ORDINANCE,

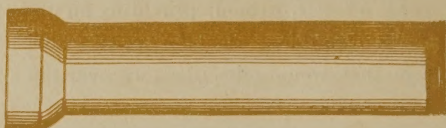

TO PROMOTE PUBLIC CLEANLINESS AND HEALTH.

Approved March 9th, 1867.

Section 5—That no dwelling-house, store or other building shall be erected or altered in any street or alley in which there is a sewer, without providing an underground connection by drain-pipes with the sewer for carrying off all drainage that would otherwise flow over the footway ; and in all cases where there are gutters now over the footway which, in the opinion of the Chief Engineer and Surveyor, approved by the Committee on Surveys and Regulations, are objectionable, and are situated upon a street where there is a sewer, or where, in the erection of new buildings after the passage of this Ordinance, the directions herein specified have been disregarded, it shall be the duty of the Chief Engineer and Surveyor to give written notice to the owner or occupants of the premises, to connect with the sewer or underground drainage ; and in case of non-compliance with said notice, for the space of ninety days after the service thereof upon the owner or occupant, there shall be incurred by said owner the penalty of thirty dollars for each month of failure.

NOTICE.

We deliver all our goods to Railroads, Steamboats, or within City limits, free of charge, and in good condition.

STRAIGHT PIPE.

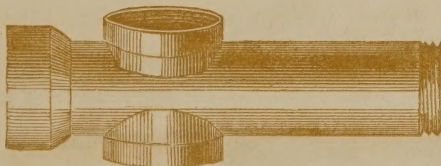

T BRANCH.

All our Pipe and Branches are made in 3 feet sections, exclusive of the large end.

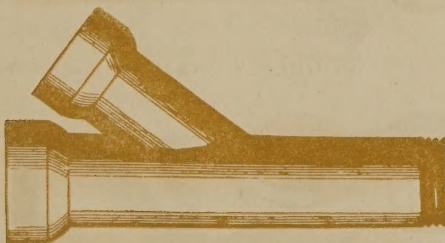

FITTINGS.

We keep constantly on hand a large Stock of

Branches, Bends, Elbows, Traps, &c.

DOUBLE T BRANCH.

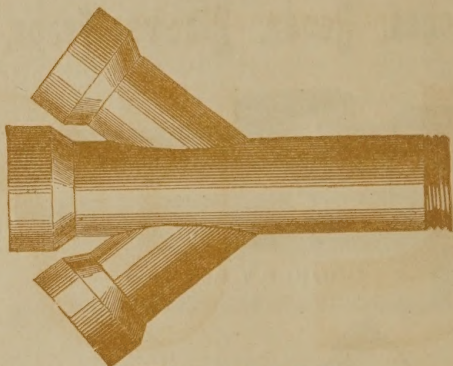

Y BRANCH.

CUSTOMERS

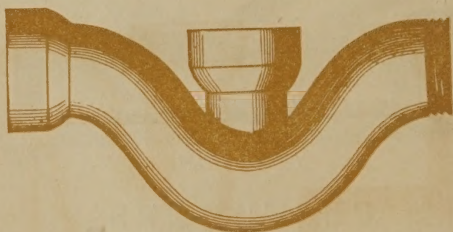

Are requested to write their orders very distinctly, so that there will be no mistake in delivering their goods.

CEMENT,

For laying Pipe, sold by the Bushel or Barrel.

DOUBLE Y BRANCH.

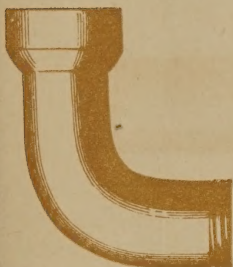

HORIZONTAL TRAP.

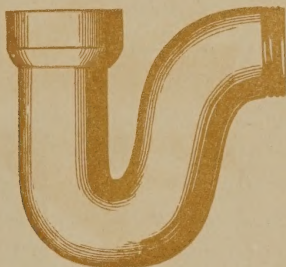

Where Cement cannot be had conveniently, good white Mortar will answer the purpose as well.

OUR FACILITIES

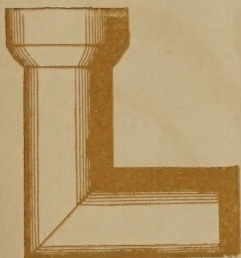

Are so great that we can fill large orders
at one day's notice.

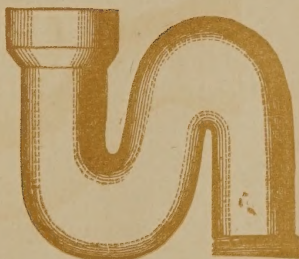

BEND.

P TRAP.

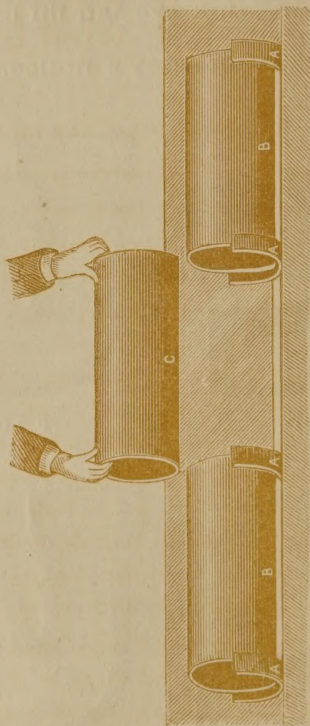

ELBOW.

S TRAP.

This cut represents Pipe made without Bell-heads, and which are used with Sleeves or Rings. 13 inch bore is the smallest size we keep on hand of this

Pipe, as they are used almost exclusively for Street Sewers, or for draining public buildings, large breweries, mills, etc.

VITRIFIED DRAIN AND SEWER PIPE.

UNDERGROUND SEWERAGE.

THIS subject should receive the attention of every man who is in any way interested in the health and convenience of the residents of this large city.

The water and drainage that has heretofore been allowed to pass from factories, dye-houses, slaughter-houses, breweries, refineries, dwellings, &c., over the pavements, and into the streets, (causing in the summer season unpleasant and unhealthy odors, and during the winter freezing over the whole surface of our streets, making them almost impassable), should all pass through pipe underground into the common sewers. This can be done without much expense by using the Vitrified Terra-Cotta Drain and Sewer Pipe, which costs but about one-third that of iron, or any other material, bringing it within the reach of every one.

Our brand of pipe is acknowledged by architects, builders, contractors, plumbers and others, to be the best material, the hardest burned, the best glazed, of any in this market.

They are made in 3 feet sections, and from 2 inches to 18 inches bore.

Our facilities are such that we can complete large orders without delay.

We desire to call attention to the weight of our Pipe, compared with that of other works, being lighter than any other made in this city; the freight on it being much less than on any Pipe made heretofore, a considerable item will be saved by those purchasing our Pipe who reside out of the city.

(See page 11 for weight of Pipe.)

The attention of property owners is directed to the ordinances passed by Councils during the years 1867 and 1868, providing for a more efficient mode of drainage than that of running refuse water over the surface, and which does away with the old-fashioned cess-pools, which are certainly a very unpleasant nuisance, and also the accumulation of ice on the sidewalks in winter from overflowing gutters.

It now remains for the owners of real estate to carry out the provisions of these ordinances, to make this a city second to none in the world for cleanliness, and the provisions made for the health and convenience of its inhabitants.

We have no fear in referring to any persons who now have their property drained with **Vitrified Sewer Pipe**, as we know that not one of them would be without this great convenience for many times the first cost, showing conclusively that this system of drainage is worthy the attention of every one.

PRICE LIST OF TERRA-COTTA SEWER PIPE.

As adopted by the Eastern Clay Manufacturers' Association, in Convention, December 18, 1871, comprising all the Sewer Pipe Manufacturers from Maine to Maryland.

DESIGNS

OF ALL THE

TERRA-COTTA CHIMNEY TOPS

That are now manufactured by us, will be found
in the following pages.

WHEN Terra-Cotta Chimney Tops were first manufactured in this country, they were a drug in the market, being considered an experiment only, and the people had become so wedded to the great unsightly brick chimneys, that it was a long time before they could be introduced; but there is a time for everything, and the time for the Terra-Cotta Chimney Top came at last.

Old brick chimneys that had become ragged and dilapidated from the effects of the Gas and Weather, were in many instances torn down and replaced by the light and tasty ornamental top.

On almost all the cottages and residences erected during the past few years in our beautiful villages, and in the suburbs of our cities, will be seen the Terra-Cotta Chimney Top, which makes a neat and beautiful finish to any style of building.

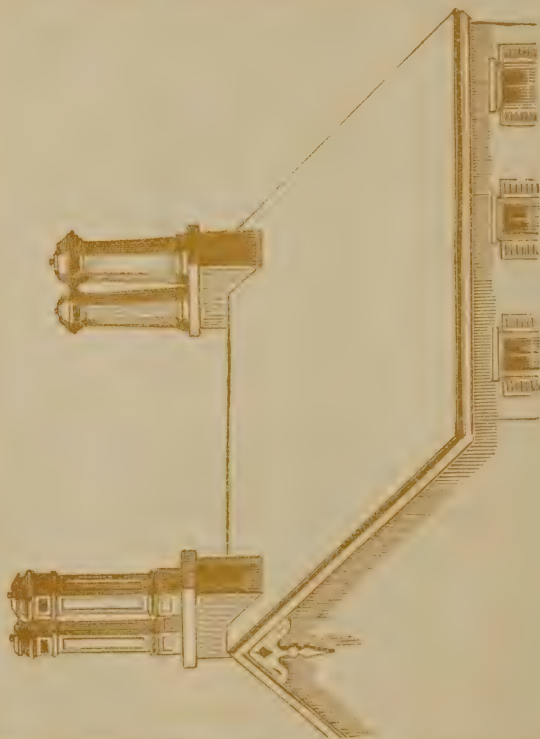

Chimney Tops

Placed in this manner on Brick Chimneys, make a very beautiful finish to any style of Cottage or Dwelling.

CAUTION.

Persons ordering Chimney Tops, should give the numbers attached to each design, as well as the size, that there may be no mistake.

TERRA-COTTA CHIMNEY TOPS, CHIMNEY FLUES, ETC.

No. 1.

13 inches.

2 ft. plain, \$2.25.
With Windguard, \$3.00.

No. 2.

13 inches.

2 ft. 6 in. plain, \$2.75.
With Windguard, \$3.50.

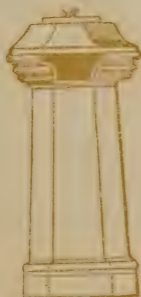

No. 3.

13 inches.

3 ft. plain, \$3.75.
With Windguard, \$4.50.

WINDGUARD TOPS.

Having had so much demand for WINDGUARD TOPS (that is, with open sides, and closed on the top to prevent the wind and storm from blowing down the chimneys), we shall hereafter make all sizes with the *Windguard attachment*, as well as our former *plain styles*, (that is, open at the top.)

No. 4.

13 inches.

3 ft. high, \$4.50
Windguard attachment.

No. 5.

15 inches.

3 ft. heavy, \$4.00.
With Windguard, \$4.75.

No. 9.

13 inches.

5 ft. high, square base, \$9.00.

With Windguard, . 10.00.

No. 8.

13 inches.

4 ft. 6 in. high, square base, \$7.00.

With Windguard, . . . 8.00.

No. 7.

13 inches.

4 ft. high, square base, \$6.00.

With Windguard, . 7.00.

No. 6.

13 inches.

3 ft. 6 in. high, square base, \$5.00.

With Windguard, . . 6.00.

Examine Cut No. 4, to see how our Windguard Tops are made.

We make Windguard Caps to go on plain Tops, and which increases their height about 1 foot, for \$2.80 extra. They are particularly adapted for Bracket

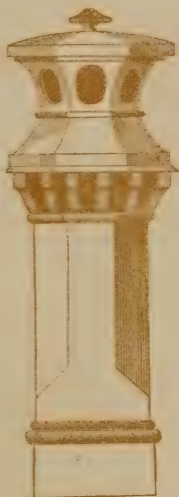

No. 10.

13 inches.

5 feet 6 inches high, square base, . . . \$10.00.
 With Windguard, . . . 11.00.

No. 14.

13 inches.

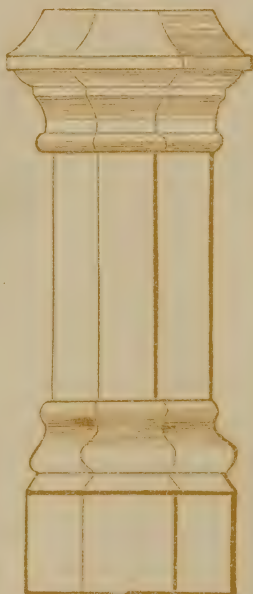

Tops, which cannot be used on chimneys down which the wind blows, except with this cap. See Cut No. 14, on this page, to see how the cap is used.

THESE DESIGNS

Are suitable for Churches, Public Buildings, School Houses, and the larger class of Dwellings, being 19 inches diameter at the base.

No. 11.

OCTAGON PLAIN TOP.

6 feet 6 inches high, \$20.00.

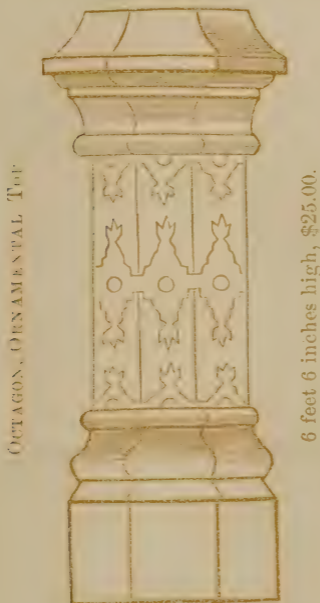

19 inches.

They are too large for the usual size brick chimneys.

ORNAMENTAL TOP.

Same size as No. 11. They are made in 3 sections for better convenience for shipping, and not so liable to be broken in placing on the chimneys.

No. 12.

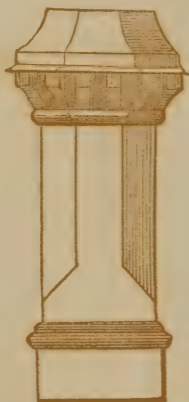

19 inches.

We do not make Nos. 11 and 12 with Windguard attachments except to order.

BRACKET TOPS.

We are now making this beautiful design of an ornamental
Top from 3 feet 6 inches to 5 feet 6 inches high.

13 in. square.

13 in. square.

The cost of the Bracket Top is \$2.75 each more than Plain
Tops of the same size, and adds greatly to the beauty and
finish of a cottage or dwelling.

IMPORTANT TO PURCHASERS.

Claiming to have the largest assortment and the finest and best finished Chimney Tops in the United States, it is therefore important to purchasers to call and examine our large and beautiful stock, and if what we assert be not true, to convict us out of our own mouths.

No. 13.

4 feet 6 inches, square top, plain, . . . \$6.00.
 4 " 6 " " " windguard, 7.00

11 inches.

No. 20.

No. 20 represents a Windcup on a straight pipe, making a cheap Chimney Top for Workshops, Factories, &c.

We say our goods are better, and as cheap as can be found elsewhere. Come and see, and judge of the facts for yourselves.

ARCHITECTS,

Builders, Furnace Dealers, Stonemasons
and Bricklayers,

TAKE NOTICE!

WE ARE NOW MAKING THE

Improved Terra-Cotta Flue Pipe,

—FOR

HOT AIR, SMOKE, ETC.

ALSO USED FOR

Ventilation of Hospitals, Asylums, Prisons,

&c., &c.

These Flues being of an oblong shape, can be placed in a 9 inch brick wall without any projection, and requiring no brickwork in front of them to keep them in their place, thereby economizing space.

Flues can be placed in any part of a building, and in any story, with perfect safety.

ECONOMY AND DURABILITY

—OF THE—

TERRA-COTTA FLUE PIPE.

We have been looking after Flues for many years, and have thus far given satisfaction to all who have used them. They cost about one-half the price of tin or iron, and being hard burned the coal gas has no effect on them whatever. We refer below to a few public buildings where our flues have been used.

EPISCOPAL HOSPITAL,	<i>Philadelphia.</i>

ORNAMENTAL TERRA-COTTA WORK,

Such as *Garden and Hanging Vases, Pedestals, Statuary, Flower Pots, &c.*, (a few samples of which will be found in the following pages,) has been manufactured at our Works for many years with unparalleled success.

Our manufacturing facilities are so extensive, that we are able to produce this beautiful ware in such quantities and with such rapidity, as to warrant us in disposing of it at much lower prices than in former years, by which means it is brought within the reach of every one.

We will not enter into an elaborate argument to show why all lovers of art should adorn their cottages and grounds with statuary, vases, &c., as the great and increasing demand on us for this character of our wares, proves that our people, in their tastes and desires to possess that which assists so much to make a home beautiful and attractive, are far in advance of the production of this elegant and useful ware.

In a small work of this kind it is impracticable to give the varied patterns that we are now making, but have selected a few designs from our extensive collection to show what we mean by Ornamental Terra-Cotta Work.

" 62,	3 " 00 " "	"	7.00

TO OUR CUSTOMERS

And the Trade in General.

The production of Terra-Cotta Ware has grown to be one of the great manufacturing interests of this country, requiring millions of dollars of capital, and employing thousands of skilled workmen. The immense increase of this industry during the past five years has naturally produced a necessity for manufacturing a better class of goods than was made when Terra-Cotta drain and sewer pipe, chimney tops, chimney flues, garden and hanging vases, statuary, pedestals, flower-pots, &c., was thought or known but little of in the United States.

We can point with pride to the fact that we have kept pace with all the improvements in this branch of business, and to-day the Philadelphia Terra-Cotta Works challenges comparison with any other factory in the country, both as regards quality, style, or finish, and capacity for turning out large quantities of the above mentioned goods.

Soliciting a continuance of your kind patronage, we are,

Respectfully,

LINK & BLACK.

ARTISTIC EXCELLENCE & DURABILITY.
